Quality, Design and Innovation

LIEBHERR

Global Success: The Liebherr Group

Liebherr is a third-generation, family-owned company founded by Hans Liebherr in 1949 with the creation of the first ever tower crane.

With 70 years of success, Liebherr has become synonymous with the equipment needed to build homes and businesses, as well as the appliances within them. One of the world's largest manufacturers of construction machinery, Liebherr has expanded to eleven divisions with a wide array of product ranges, including earthmoving, mining, mobile cranes, tower cranes, concrete technology, maritime cranes, aerospace and transportation systems, gear technology and automation systems, components, hotels and domestic appliances.

The company currently employs over 46,000 persons in more than 130 companies in over 50 countries worldwide. Liebherr Appliances is Europe's largest privately owned manufacturer of fridges and freezers for residential and commercial use, with an annual production of more than 2.1 million units.

Liebherr Warranty Plan

2 YEAR Warranty

Full Two-Year Warranty

For two (2) years from the date of original purchase, your Liebherr warranty covers all parts and labor to repair or replace any part of the product which proves to be defective in materials or workmanship.

5 YEAR Warranty

Full Five-Year Warranty

For five (5) years from the date of original purchase, your Liebherr warranty covers all parts and labor to repair or replace any components that prove to be defective in materials or workmanship in the Sealed System. The Sealed System refers to only the compressor, condenser, evaporator, drier and connecting tubing.

12 YEAR Warranty

Limited 6–12 Year Warranty

From the sixth (6th) through the twelfth (12th) year from the date of original purchase, your Liebherr warranty covers all parts that prove to be defective in materials or workmanship in the Sealed System (parts only).

Why Liebherr

German Quality & Heritage

Liebherr is a world leader in developing premium quality cooling and refrigeration technologies. Our German engineered products are acclaimed for advanced food preservation, design flexibility, maximum energy efficiency and ease of use. Headquartered in Germany since 1954, Liebherr Appliances distributes the widest range of European refrigeration and freezing solutions around the globe. Liebherr continues to research and develop products that match or exceed not only the standards we set for ourselves, but also the quality our loyal customers have come to expect.

Silent Operation

Liebherr appliances are some of the quietest in the industry – as quiet as a library. Variable speed compressors are always operating at optimal capacity, ensuring maximum food preservation with quiet operation. Combined with soft-start technology, these compressors offer quiet operation and minimal electrical surge at start-up. Every new product is tested in our professional sound chambers to ensure that noise levels are kept to a minimum.

Advanced Food Preservation

Foods preserved in ideal storage temperatures and perfect air humidity will preserve their vitamins, nutrients, flavors, and aromas for far longer, which is the key to achieving a healthy lifestyle. Liebherr's advanced food preservation technologies guarantee the perfect environments for all kinds of foods. BioFresh, SuperCool, SuperFrost and DuoCooling are just a few examples of performance enhancing features that contribute to superior, long-lasting food freshness.

ActiveGreen Initiative

Energy efficiency is at the heart of our ActiveGreen commitment, and it is reflected in every aspect of our design and manufacturing process. An industry trailblazer in green manufacturing, Liebherr utilizes progressive practices such as recovering and reutilizing energy to heat buildings, using 100% recyclable packaging, and using purified water to ensure that production is pollution free, all with the goal of having the least damaging effect on the environment.
Better Use of Space

Our innovative food storage features allow for the optimal storing of products, for quick and easy access to your favorite foods while reducing food waste. Divisible glass shelves, interchangeable glass and bottle shelves, FlexSystem, VarioSpace, and gallon storage on the door are just some of the ways in which Liebherr refrigerators fit more cubic feet of your everyday life.
Diverse Design Options

Liebherr appliances are designed to inspire awe and integrate seamlessly into your kitchen motif. Multiple size configurations, installation options, and choice of stainless steel or personalized finishes allow for perfect integration into your dream kitchen. From refrigerators, to wine cabinets, to outdoor appliances, Liebherr Appliances offer a diverse range refrigeration and freezing solutions for your home.

GERMAN ENGINEERING

Experience Super Freshness with BioFresh

Keeping your food fresh in a Liebherr is easy. BioFresh guarantees the perfect climate for super-long-term freshness. Through its advanced technology the temperature is kept at just above freezing.

Each drawer can be used individually and provides ideal humidity. The **DrySafe** drawer with low humidity is ideal for storing meat, fish and dairy products, while fruits and vegetables are best kept in the high humidity **HydroSafe** or **Fruit & Vegetable-Safe** (optional). The natural loss of moisture in fruit and vegetables is significantly reduced. It's simple: fresh is better.

Freshness Perfected with BioFresh

Liebherr's BioFresh technology contributes to a healthy diet and wellbeing in addition to offering convenience that fits with your busy lifestyle. Nature offers a whole range of essential nutrients vitamins, minerals and carbohydrates to give us energy. However, the right temperature and ideal humidity conditions are essential if food is to retain its healthy properties and delicate flavours as long as possible.

Liebherr's BioFresh technology provides perfect freshness for all types of food and delivers impressive long lasting preservation as well as day-to-day convenience.

The Liebherr BioFresh App

biofresh.liebherr.com

It provides the ultimate tool for all health conscious food lovers to easily access valuable information regarding food storage, vitamins, minerals and shelf life.

The information relates to storage in a BioFresh drawer compared to a conventional fridge.

Key Benefits – Freestanding/Semi Built-in Appliances

Smart Steel

SmartSteel: Available on select freestanding/semi built-in models, SmartSteel finish significantly reduces the visibility of fingerprints, is easy to clean, and is scratch resistant. Simply wipe with a dry or damp cloth to maintain this beautiful exterior.

Bio Fresh

BioFresh: BioFresh drawers provide a customizable interplay of temperature and humidity controls. The DrySafe drawer with low humidity is ideal for storing meat, fish, and dairy products, while fruits and vegetables are best kept in the high humidity HydroSafe.

Soft System

SoftSystem: SoftSystem integrated into the appliance door cushions the door closure, eliminating slamming, even when shelves are with fully loaded. In freestanding appliances, the door will close automatically from an opening angle of approx. 45°.

Super Cool

Super Frost

SuperCool/SuperFrost: Simply quick chill and/or freeze just-bought groceries to preserve optimal freshness and seal in flavors, textures, and essential vitamins and minerals.

Vario Space

VarioSpace: VarioSpace is Liebherr's practical solution to accommodating bulky items. All freezers include drawers and glass shelves that can be conveniently removed to create extra storage space when needed.

Stainless steel back wall: The high-quality, stainless steel back wall is both eye-catching and highly functional. The stainless wall prevents foods from freezing up against the evaporator, ensuring that the back of the refrigerator is always drip and ice-free.

Features shown are model dependent. Product features may vary.

The slim styling and urban design of the **CBS 1360** is the perfect appliance for small spaces, galley kitchens, or apartment living. This sleek 24" refrigerator-freezer includes unique features such as BioFresh technology, which helps foods retain their healthy vitamins, aromas, and appetizing appearance for significantly longer than in conventional refrigerators. The CBS 1360 also includes LED light columns inside the refrigerator which function as shelf support for the scratch resistant and easy-to-clean GlassLine shelves. Smart interior design features include a glass/bottle shelf, foldable glass shelf, gallon holders to maximize space, and a stainless steel back wall which prevents dripping and the build-up of ice. Liebherr's SmartSteel material on the door is scratch resistant and makes fingerprints virtually disappear.

Alternatively, the CBS 1360 can be flawlessly built into kitchen cabinetry to fit personalized designs that reflect your lifestyle. Liebherr offers an exterior water filter accessory for the CBS 1360 which can be placed into the cabinetry above or beside the appliance.

The 30" **CS 1400R** refrigerator-freezer is the perfect appliance for installations of a smaller footprint with upper cabinets, while encompassing all of the great features and benefits of a Liebherr appliance. While being one of the most energy efficient appliances in its class, the CS 1400R includes smart interior design features like a foldable glass shelf, and a stainless steel back wall which prevents dripping and the build-up of ice. Liebherr's SmartSteel material on the door is scratch resistant and makes fingerprints virtually disappear, while doors close automatically and gently thanks to our SoftSystem technology, which eliminates slamming even when shelves are fully loaded.

Liebherr's DuoCooling system, with individual variable speed compressors, provides superior performance and efficiency, as well as advanced food preservation. The dual refrigeration system creates optimal conditions in both the refrigerator and freezer compartments, which lengthens the shelf life of foods for a healthier lifestyle. Individual silent cooling systems ensure accurate temperature and humidity controls so that your fresh foods never dry out.

Key Benefits – Fully Integrated Appliances

LED

Light columns: Premium appliances come with LED light columns, which incorporate multiple LED bulbs, evenly illumining the interior of the refrigerator. The special satin-finish on the lighting cover, and soft brightening of the lights upon opening, give an elegant and high-class ambiance.

Bio Cool

BioCool: BioCool regulates humidity to keep fruits and vegetables fresher for longer. The drawer extends smoothly on either a roller system or on premium-quality telescopic rails, both of which guarantee ease-of-use, convenient access, and a perfect view of stored products. Humidity is regulated via a slider control.

Telescopic Rails

Freezer drawers: Double freezer drawers mounted on telescopic rails offer plenty of storage space. A self-closing system for both drawers ensures an easy and convenient handling. The freezer drawers are perfectly illuminated by LED lights.

Ice Maker

IceMaker: Liebherr's automatic IceMaker produces perfect half-moon crescent ice cubes and keeps a constant supply on hand for every occasion.

Super Quiet

Gallon storage on door: Liebherr refrigerators are designed to fit more cubic feet of your everyday life. The durable, yet elegant, GlassLine door racks easily hold gallon milk or juice on hand.

SuperQuiet: Noise is kept to a minimum thanks to virtually silent, speed-controlled, and specially-absorbed compressors. Alongside a low noise cooling circuit, these features ensure exact performance, energy efficiency, and SuperQuiet operation.

HC 2080

Features shown are model dependent. Product features may vary.

The sophisticated, elegant European design of the 24" **HCB 1060** refrigerator-freezer is the perfect appliance for small spaces, galley kitchens, or apartment living. The HCB 1060 blends in beautifully with any kitchen cabinetry, providing diverse design options to fit your dream kitchen. Liebherr's door-on-door technology allows for custom paneling to be affixed directly onto the appliance door, ensuring that the cabinet and refrigerator door open as one, allowing for additional design options and easy installation. Liebherr's automatic IceMaker with fixed water connection produces crystal clear ice cubes, keeping a constant supply on hand for every occasion.

This seamless, cabinet-deep HCB 1060 is slim in stature, yet full of innovative features such as BioFresh technology. While the DrySafe is suitable for storing meat, fish and milk products, the high level of humidity in the Fruit & Vegetable-Safe is even better at retaining the natural moisture in unpackaged fruit and vegetables. This means food not only stays fresher for longer, but also retains its vitamins and aroma for a considerably longer period than in a conventional fridge compartment. The practical FlexSystem helps to ensure neat separation and clear sorting.

Show off the materials and design of your custom kitchen to the fullest with the stylish fully integrated refrigerator-freezer **HCB 2080**. Outstanding LED lighting can be found on the ceiling and refrigerator side walls, which double as shelf support, as well as inside the freezer drawers. Other smart interior design features include a stainless steel back wall which prevents dripping and the build-up of ice, and fully extendable SoftTelescopic freezer drawers which provide reliable self-retraction and soft closing. The automatic IceMaker with fixed water connection produces perfect half-moon crescent ice cubes, which can be taken from freezer-to-table thanks to the removable ice bin.

Liebherr's BioFresh technology helps foods retain their healthy vitamins, aromas, and appetizing appearance for significantly longer than in conventional refrigerators. Each BioFresh drawer can be adjusted individually, and provides ideal humidity for versatile storage solutions. The smart DuoCooling system, with individual variable speed compressors, ensures that there is no air exchange between the refrigerator and freezer compartments, guaranteeing that food won't dry out, and that the freezer is always ice-free.

Key Benefits – Undercounter Appliances

Soft Telescopic

SoftTelescopic: Food can be stored securely within reach thanks to fully extendible pull-out drawers. The SoftTelescopic system provides convenient and reliable self-retraction with soft closing.

Glass pull-out shelves: Food is stored safely and easily accessible on the fully extendible pull-out glass shelves. The glass pull-out shelves made of safety glass are sturdy and easy to clean as well as being adjustable by means of practical rail dividers.

ADA Compliant

Ventilation: Liebherr's undercounter appliances are available for integrated use or for fitting with décor panels. Ventilation occurs through the base plinth, so a ventilation grill is not required on top of the appliance.

32"

32" – 34"

ADA compliant: Liebherr's undercounter appliances are ADA compliant, designed to fit undercounter heights between 32" and 34".

LiftUp Box

Soft System

LiftUp-Box: The LiftUp-Box allows you to fully utilise the storage space below the pull-out drawer. It is ergonomically attached, easy to take out and can hold up to 8.8 lbs. (4 kg). When pulled out, the LiftUp-Box pushes up out of the base recess, allowing the food to be removed easily.

SoftSystem: This feature provides added safety and convenience. Integrated on the door, the SoftSystem cushions movement when the door is closed. This SoftSystem ensures that the door closes gently even when fully loaded inside. The door automatically closes from an angle of approximately 30°.

RO 510

Features shown are model dependent. Product features may vary.

The **UPR 513** takes both the designer and the user in mind, offering convenient features and design flexibility to fit any home. The universally designed, pull-out undercounter refrigerator can be adjusted in height to match that of the counter space, providing an optimal fit for countertops up to 34" high. Like all Liebherr integrated appliances, the UPR 513 uses door-on-door technology, allowing custom panels to be affixed directly onto the appliance door, ensuring seamless integration within your custom design, as well as easy installation.

The UPR 513 includes a variety of flexible storage features to fit your specific needs. The door bin can be used to store tall beverages, or can be adjusted for larger gallon storage. Items stored in the bottom bin are automatically raised upon door opening thanks to the LiftUp-Box system, bringing your foods closer and easier within reach. The UPR 513's fully extendable SoftTelescopic drawers provide reliable self-retraction and soft closing, while the elegant, yet tough, spacesaving GlassLine shelves are both scratch resistant and easy to clean.

Noise is kept to a minimum thanks to virtually silent, speed controlled, and specially-absorbed compressors along with a low noise cooling circuit, ensuring exact performance, energy efficiency and SuperQuiet operation.

The 24" **UR 500** takes both the designer and the user in mind, offering convenient features and design flexibility to fit any room, whether it's in a home or business. The universally designed, single-door undercounter refrigerator can be adjusted in height to match that of the counter space, providing an optimal fit for countertops up to 34" high. Like all Liebherr integrated appliances, the UR 500 uses door-on-door technology, allowing custom panels to be affixed directly onto the appliance door, ensuring seamless integration within your custom design, as well as easy installation.

As a true undercounter refrigerator, the UR 500 offers the perfect solution for storing your favorite foods in any room, whether it be in the kitchen island, office, or home theater. The UR 500 includes a variety of flexible storage features, like a large removable VarioBox that can be taken from fridge-to-table, multi-use drawer, and an additional storage bin at the bottom of the refrigerator. The UR 500 includes convenient door racks, even for larger gallon items. Doors close automatically and gently thanks to our SoftSystem technology which eliminates slamming, even when shelves are fully loaded.

The UR 500 can be installed in a Side-by-Side combination alongside other undercounter refrigerators, freezers, beverage centers, or wine cabinets as part of a central food and beverage hub. Noise is kept to a minimum thanks to virtually silent, speed controlled, and specially-absorbed compressors along with a low noise cooling circuit, ensuring exact performance, energy efficiency and SuperQuiet operation.

The 24" **UB 501** takes both the designer and the user in mind, offering convenient features and design flexibility to fit any room, whether it's in a home or business. The universally designed, single-door 32 °F refrigerator can be adjusted in height to match that of the counter space, providing an optimal fit for countertops up to 34" high. Like all Liebherr integrated appliances, the UB 501 uses door-on-door technology, allowing custom panels to be affixed directly onto the appliance door, ensuring seamless integration within your custom design, as well as easy installation.

This UB 501 consists of three full BioFresh compartments, which helps foods retain their healthy vitamins, aromas, and appetizing appearance for significantly longer than in conventional refrigerators. Included in one of the BioFresh drawers is Liebherr's FlexSystem storage solution, where fruits and vegetables can be clearly organized and separated, or stored according use-by date. The UB 501 also includes a hidden compartment at the bottom of the refrigerator for additional storage. This undercounter model is the perfect solution for when you require additional storage of your freshest and healthiest organic foods.

The UB 501 can be installed in a Side-by-Side combination alongside other undercounter refrigerators, freezers, beverage centers, or wine cabinets as part of a central food and beverage hub. Noise is kept to a minimum thanks to virtually silent, speed controlled, and specially-absorbed compressors along with a low noise cooling circuit, ensuring exact performance, energy efficiency and SuperQuiet operation.

The **UF 501** takes both the designer and the user in mind, offering convenient features and design flexibility to fit any room, whether it's in a home or business. The universally designed, single-door freezer can be adjusted in height to match that of the counter space, providing an optimal fit for countertops up to 34" high. Like all Liebherr integrated appliances, the UF 501 uses door-on-door technology, allowing custom panels to be affixed directly onto the appliance door, ensuring seamless integration within your custom design, as well as easy installation.

As a true undercounter freezer, the UF 501 offers the perfect solution for storing your favorite frozen foods in any room, whether it be in the kitchen island, bar, or game room. This 24" freezer includes three transparent and fully removable FrostSafe drawers on rollers to best organize frozen foods. As the FrostSafe drawers are fully enclosed, the continuously circulating cold air does not escape when the door is opened, enhancing the freezer's energy efficiency. Doors also close gently and without slamming thanks to Liebherr's SoftSystem technology. The UF 501 also includes a hidden compartment at the bottom of the freezer for additional storage.

The UF 501 can be installed in a Side-by-Side combination alongside other undercounter refrigerators, freezers, beverage centers, or wine cabinets as part of a central food and beverage hub. Key Benefits – Wine Cabinets

LED lighting: All Liebherr wine cabinets are equipped with innovative LED lighting, which can be dimmed for a pleasing ambient light inside the wine cabinet, while emitting less heat, optimal for long-term illumination.

Presentation shelf: The practical shelf of the Vinidor models fulfills both bottle storage and presentation functions. The bottles can be stored horizontally at the rear.

Activated charcoal filter: During prolonged storage, wines can be adversely affected by environmental odors. Optimum air quality is guaranteed in Liebherr wine cabinets thanks to the easy-to-replace activated charcoal filter, which purifies incoming air.

Integrated lock: The integrated lock is very sturdy and protects your fine wine collection against unauthorised access.

Electronic LCD display: Touch electronic control systems allow the temperature to be set to the exact desired degree, easily and accurately thanks to the electronic LCD display.

Compressors: Even slight vibrations can disturb the wine maturing process and prevent the tannins from settling. Specially developed, exceptionally low-vibration compressors are included in all Liebherr wine cabinets, ensuring that wine is optimally stored.

WS 17800

Wine models are intended for storing wine exclusively. Maximum indicated bottle capacity is based on Bordeaux bottles (0.75 l).
Features shown are model dependent. Product features may vary.

The fully integrated **HW 8000** multi-temperature wine cabinet is sure to compliment any kitchen, bar, or living room design. The temperature in each of the two sophisticated temperature zones can be set between 41°F and 68°F, ensuring optimal storage conditions for suitable for storing reds, whites, and champagnes. The HW 8000 provides storage flexibility for up to 80 Bordeaux bottles thanks to its beech wood shelving and ten storage areas at varying heights, ideal for grouping different bottles types and sizes. A flexible clip-on labelling system ensures a clear overview of your wine collection. Alternatively, you can display your wines on the high-quality presentation shelf.

The HW 8000 can be fully integrated to match your unique design, matching cabinetry heights of up to 80" or 84", including Side-by-Side combinations for maximum wine storage. A stainless steel panel accessory kit is available for when your design calls for a stainless steel look.

The HW 8000's activated charcoal filter provides superb air quality by removing contaminating substances from the cabinet air. The insulated glass door with UV protection and LED lighting, alongside the activated charcoal filter, protect your finest wines from busy kitchen influences such as light and damaging odors.

The innovative and superbly designed **HWgb 1803** wine cabinet is designed for today's modern kitchen. Featuring high performance technology alongside easy-to-use features, the HWgb 1803 proves that it's possible to save energy without compromising convenience and design. Employing state-of-the-art climate technology with heating and cooling circuits, alongside FreshAir activated filtration, the HWgb 1803 ensures the very best conditions for wines to quietly mature and develop their full flavor. Precision electronics, specialized compressors, and a variety of additional innovative features, make the HWgb 1803 the ideal model for optimally storing wine.

The HWgb 1803 includes TipOpen technology – the perfect solution for hands-free kitchen designs. When the glass door is gently tapped, TipOpen technology partially opens the cabinet, facilitating further opening. If the door is not fully opened within three seconds, the door will self-close, ensuring that ideal air humidity is maintained within cabinet. When fully opened, the door opens downward like an oven.

The easy-glide accessory drawer can be used to store wine accessories directly below the HWgb 1803.

PLUS X AWARD
LIEBHERR
High Quality
Ease of Use
The **WUgb 3400** offers a number of innovative solutions for wine storage. The temperature in each of the two sophisticated temperature zones can be set between 41°F and 68°F, ensuring optimal storage conditions for reds, whites, and champagnes.

The elegant black glass door, featuring TipOpen technology, offers seamless integration into handle-free kitchen cabinetry. This smart wine cabinet can hold up to 34 Bordeaux bottles and when lightly tapped, the glass door partially opens, facilitating further opening. If the door is not fully opened further within three seconds, the door will self-close, safeguarding your precious wines.

Liebherr's design uses recirculated forced air cooling and a permanent fresh air supply via an easily exchangeable activated charcoal filter. Humidity ranges between 50 and 80 percent, permitting wine to breathe as it matures and to keep corks supple. Specially developed, quiet compressors ensure that the WUgb 3400 produces the lowest vibration possible as fine wines love peace and quiet as much as anyone.

Temperature, humidity, vibration, and light are the most important elements of wine storage. Liebherr's **WU 3400**, with dual temperature zones, addresses all four of these areas with the best storage and preservation needs in mind. The temperature in each of the two sophisticated temperature zones can be set between 41°F and 68°F, making the cabinet suitable for storing reds, whites, and champagnes.

As a true wine storage unit, the WU 3400 includes heating capabilities to maintain accurate temperatures when the location of the appliance is colder than the desired set temperature. Temperatures will not drop below 32°F thanks to the safety thermostat, ensuring the best quality of your wines. In addition to the constant temperature feature, ideal climates are created with alongside exceptional air quality. Liebherr's design uses recirculated forced air cooling and a permanent fresh air supply via an easily exchangeable activated charcoal filter.

Humidity ranges between 50 and 80 percent, permitting wine to breathe as it matures and to keep corks supple. Specially developed, quiet compressors ensure that the cabinet produces the lowest vibration possible as fine wines love peace and quiet as much as anyone. The WU 3400 is available in stainless steel or can be designed with a custom panel using the overlay accessory kit.

The **WU 4500** wine storage cabinet is ideal for storing wines for long periods of time, allowing them to mature to perfection. The temperature of the cabinet can be set between 41°F and 68°F, making the cabinet suitable for storing reds, whites, and champagnes.

The WU 4500 can hold up to 46 Bordeaux bottles, stored on beech wood shelves with smooth telescopic rails. With a constant supply of fresh air via an activated charcoal filter and continuously circulating air cooling, this appliance guarantees consistent high air quality during the maturing process. A specially developed compressor ensures that wines are stored in a vibration-free environment so as to not disturb the wines' sediment.

The WU 4500 can be integrated easily and elegantly into any custom kitchen design as it ventilates through the toe kick, eliminating the need for counter slots. This sophisticated appliance also boasts a digital temperature display conveniently located at the top of the cabinet with visibility through the elegant glass door.

The **WS 17800** satisfies your need for the smartest, most elegant way to store wine, in addition to adding a sophisticated flair when entertaining your guests. While stylish enough to fit any decor, the WS 17800 also creates the ideal conditions for wines to mature successfully – constant air quality, temperature, and humidity controls, alongside quiet, vibration-free storage. Specially developed, quiet compressors ensure that the cabinet produces the lowest vibration possible, allowing wines to fully mature. The insulated glass door with UV protection, alongside the activated charcoal filter, protect the wines from busy kitchen influences such as light and odor.

The three temperature zones within the WS 17800 can be set between 41°F to 68°F, making the cabinet suitable for the storage of reds, whites, and champagnes. This model is equipped with an alarm system to alert the user if the door has been left open, or if the selected temperatures have been compromised. The energy efficient LED ceiling light not only emits virtually no heat, but it is dimmable to cast a cool glow across the room.

As a true wine storage unit, the WS 17800 includes heating capabilities to maintain accurate temperatures when the location of the cabinet is colder than the desired set temperature. Liebherr's design uses recirculated forced air cooling and a permanent fresh air supply via an easily exchangeable activated charcoal filter. Humidity ranges between 50 and 80 percent, permitting wine to breathe as it matures and to keep corks supple. Attractive beech wood shelving with smooth telescopic rails, and a unique drop-down presentation shelf, makes displaying your finest wines elegant and easy.

Key Benefits – Design & Lifestyle Appliances

LED

LED lighting: Liebherr's humidor has LED lighting with dimmer function incorporated in the glass door. As the LEDs emit virtually no heat, the cigars can be exposed to the light for long periods of time without damage.

LED

LED lighting: For ideal presentation of your best wine, the WS 1200 features LED lighting with dimmer function and separate switch. As the LEDs emit minimal heat and no UV radiation, wine can be showcased bathed in light for lengthy periods without compromosing its quality.

Fine cedar wood: Our XS 200 humidor features two presentation boxes and two wooden shelves crafted from Spanish cedar wood. The presentation boxes are perfect for storing loose cigars.

Wall mount option: Both the WS 1200 wine cabinet and XS 200 humidor can be wall-mounted as an attractive eye-catcher with convenient access for serving.

Ideal humidity: The integrated water tray can accommodate 34 oz of distilled water for ideal humidity. Sensors regulate precise humidity level selected. The display informs when water needs to be replenished.

Touch electronic control system: The perfect wine storage temperature is +46 °F to +54 °F. White wine should ideally be stored below +50 °F and red wine at up to +64 °F. Our electronic control system allows temperature to be set to the exact degree required between +41 °F to +68 °F.

WS 1200 I XS 200

Features shown are model dependent. Product features may vary.

Liebherr's **WS 1200** offers premium wine storage in an attractive package to fit within any setting. This tabletop wine cabinet holds up to 12 Bordeaux bottles on solid beech wood shelving, and includes a drawer to store wine accessories, chocolates, or candies.

The temperature of the cabinet can be set between 41 °F and 68 °F, making the WS 1200 suitable for storing reds, whites, and champagnes. Energy efficient LED lighting can be controlled with a dimming function creating the perfect atmosphere without affecting the temperature of the wines.
